**Attachments:** PHCB-015\_QAPP\_PFAS\_NHDES\_AIR addendum.docx

Sania,

Here is my first pass through this DRAFT QAPP. I'll admit being a bit confused about a non-quantitative QAPP, it seems a bit contradictory. Perhaps its just best to put down that all is going to be non-quantitative. Note that we've not finalized the NH sampling plan. They have expressed interest in adding dust, sludge, suspensions, condensate fluids, and possibly other mucky samples that they can collect while on site. I'm not certain what to include to make this 'as inclusive as possible.' If everything falls under the non-quantitative umbrella, with an intent of identifying (or assigning tentative identifications), can we leave the door a bit open to include "samples delivered" and not specify?

In short, can I sit down with you sometime next week (Tuesday morning or Wednesday morning) to begin to refine this?

John
